EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Peter L. Michaelson on September 7, 2006.

The application has been amended as follows:

689
The application has been amended as follows:
Claim 19 (^{Currently Amended} ~~previously presented~~): The method recited in claim 18 further comprising the step of: during a first instance of clocking the shift register, clocking the shift register for a ~~sufficiently~~ long time such that the contents of all elements of the shift register largely depend on bits of the key.

The following is an examiner's statement of reasons for allowance:

With regard to claim 15:

Amendments to the claims overcome the prior art rejections made in the previous action. Applicant's arguments with respect to the linear and non-linear functions of the single shift register are persuasive over the prior art. The prior art of record (Moroney et al. 5,054,067) disclosed two separate shift registers, one having a linear feedback function and the other having a non-linear feedback function, each controlled by a single clock signal. Moroney failed to teach the linear and non-linear feedback function operating independently and separately from each

other. None of the other references cited in the prior action combine with Moroney to disclose the amended limitations to claim 15.

An updated search did not uncover any new prior art. No art disclosing, nor motivation to combine has been found which recites separately and independently controlling a linear and non-linear feedback function for one shift register.

All other pending claims are dependent on allowable claim 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kristin D. Sandoval whose telephone number is 571-272-7958. The examiner can normally be reached on Monday - Friday, 8:00-5:30.
